MAKE IN INDIA

The Make in India initiative was launched in 2014 by the honorary Prime Minister of India to boost the domestic manufacturing sector. The initiative was devised to transform the industry by creating and encouraging avenues for the development, manufacturing, and assembly of products in India. Drawing inspiration from the four pillars of the initiative, Highland Industrial City strives to present a New Mindset, New Sectors, New Infrastructure, and New Processes to transform the region's industrial landscape. With world-class design and cutting-edge infrastructural facilities, the development is poised to be a hub of growth for new-age industrial magnates and ambitious entrepreneurs.

THRIVING THROUGH INDUSTRY

At the helm of every economy is industry - driving crucial growth and consistent progress for every aspect of a region. Whether it is local, state, national, or international - industry is linked to income, opportunities, and empowerment for the people and for governments.

Since the days of yore, industrial towns have always flourished and are often the first choice for those seeking a better way of life. These towns often become hubs of development and advancement as they are characterised by technological progress. In India, cities like Jamshedpur and Bombay are testament to this fact, and in modern times we have many more such examples.

Elevating the modern industrial revolution a step further is the vision of the Indian government under the aegis of the Make In India scheme. The government of India is nurturing a secure and self-sufficient economy by strengthening the industrial landscape of the country.

DERABASSI - LALRU: A RESPECTED INDUSTRIAL LANDSCAPE

Strategically located on the Chandigarh-Delhi national highway, DeraBassi-Lalru became the perfect destination for rapid industrial growth as multiple manufacturing units were established in the late 1980s and early 1990s.

Even today, the Ramgarh-Barwala belt of DeraBassi is home to numerous manufacturing units of local, regional, national, and international brands including food processing, precision machinery, sanitary ware, construction goods, and electrical appliances amongst others.

The regional economy was built and continues to thrive on the local industry.

HIGHLAND INDUSTRIAL CITY

A REVOLUTIONARY NEW DIMENSION TO DERABASSI- LALRU INDUSTRIAL BELT

Lalru's strategic location and established reputation as a manufacturing hub with approved industrial zones make it ideal for a path breaking organised industrial park. Highland Industrial City will be the first-of-its-kind world-class hub providing robust and cutting edge infrastructural support to the industry.

Designed to be an innovative solution to the growing needs of the industry, the necessities and goals of the progressive industrial entrepreneur are the guiding principles for Highland Industrial City.

Offering fully customised sheds, Highland Industrial City will deliver versatile solutions to the region's industrial needs. Highland Industrial City will also offer tailor made solutions and act as a catalyst for industrial growth in this region.
